

AEROPLEX GROUP PARTNERS

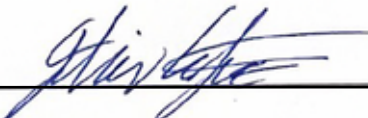

SOURCING & PROCUREMENT POLICY

Aeroplex Group Partners' commitment to environmental stewardship extends to the relationships we maintain with vendors and suppliers. We seek to work with those who share our values regarding the importance of environmental sustainability and encourage them to follow our sustainability principles when conducting business. We expect that those with whom we obtain supplies and services practice good environmental stewardship, comply with applicable environmental laws and regulations, minimize their use of energy and resources, where applicable.

Aeroplex Group Partners recognizes that our effectiveness in reducing our carbon footprint depends partially on the operational performance of our business partners. We therefore pledge to consider the environment when selecting new suppliers or maintaining those existing.

Specifically, we seek to work with suppliers who:

- Work to reduce their environmental impact including consumption of natural resources, waste generation, recycling, and greenhouse gas (GHG) emissions including CO2.
- Have established procedures to prevent spills and mitigate and manage release of hazardous materials.
- Communicate openly about their environmental efforts and challenges.
- Implement programs to manage solid waste in compliance with regulations and in support of employee safety and public health.
- Implement programs to ensure products being used to do not contain restricted or banned materials.

Signed:  Date: December 12, 2022
